

UNDERSTAND YOUR BRAIN COLOR COMBINATIONS

Sir Isaac Newton discovered that when a prism broke up light, it revealed a continuous play of color—a rainbow. By definition, a rainbow is the following:

- A spectrum of brilliant color.
- Highly varied or multifaceted.
- Any multicolored arrangement or display.

Your “Brainbow” Personality

The structure and relationship among the colors in a rainbow is not definitive. The colors harmoniously blend one into the next, just as you will learn to blend your Brain Colors to reduce conflict and increase harmony in your professional life.

You could select one or all of the definitions to describe your Brain Colors, or “Brainbow.” In the previous chapters, you gained insight into each personality type’s strengths and perspectives and how you can appreciate their differences. Now that you have identified the numerical sequence of your Professional Health Care Brain Colors, you can examine the full range of your “Brainbow” to appreciate the contrasting and complementary Brain Colors.
